Company recall code	M5D
Product description	Passenger car.
Risk type	Environment
Risk description	Some vehicles have been registered with class A+ tyres, while the tyres actually fitted are class B. Therefore, the CO_2 emissions declared in the certificate of conformity, which are related to the tyre class, are incorrect. The tyre class has an impact on rolling resistance and therefore affects CO_2 emissions. Class B tyres generally have a higher rolling resistance than class A+ tyres.

Legal provisions (at EU level) and European standards against which the product was tested and did not comply	The product does not comply with the Regulation on the approval and market surveillance of motor vehicles and their trailers, and of systems, components and separate technical units intended for such vehicles.
